- Program the car to avoid obstacles
- Programming to control the car with remote and control through an application with a camera

Bus roll call

11/2024 To Present

- When students get on the bus, they will have a swipe card and save that data to a google sheet.
- When the bus stops, the student gets off the bus and swipes the card, which will be saved to a google sheet. If there are still students on the bus, the sensors will work and notify the bus owner by calling and sending pictures to the owner's gmail.
